

SPECIFICATION AMENDMENTS

Sir:

In response to the Office Action of October 7, 2005, please amend the paragraph 1 on page 4 as follows:

The present invention shown in Figs. 1 and 2 is a combination display frame shown generally at 10 comprising an outer periphery 12, a matte 14, backing means 16, light means shown as a fluorescent light source 18, and at least two pieces of art 19. In the preferred embodiment, said at least two pieces of art 19 comprise at least partially transparent piece of art 20, and a generally opaque piece of art 22 with an outer perimeter 23. Said matte 14 and said backing 16 are of the same general shape as said periphery 12 but of slightly smaller dimension.

Sir:

Please amend the second paragraph on page 5 of the application as follows:

In the preferred embodiment, said light means 18 is a slim light panel and fits directly into said third opening 34 behind said at least partially transparent piece of art 20. A removable access panel 40 (shown in Fig. 4) is provided which detachably secures said light means 18 in place. Said removable access panel 40 may include latching means 41. Also in the preferred embodiment, means for alternatively actuating said light means ☐ 42 is a switch that is preferably associated with said outer periphery 12 and connected to said light panel 18 by wire 44 serving as a circuit means.
